VivoGRC and its apps

For HR: a direct line to every staff member, and the work of the doctor and the safety officer in plain sight, all in one place.

on request we build it with you

Staff Portal

Every staff member on their phone; HR with a direct line to each one.

ON EVERY STAFF MEMBER'S PHONE

- Company notices and questions, answered right there.
- Their to-dos and compliance: courses, exams, licenses.
- Calendar, reminders, wellbeing and surveys.

WHAT HR GETS

- Reaches every staff member, out in the field too.
- Knows who saw what and who replied.
- Sees what safety requires, person by person.
- Keeps a record of every signature, outsiders included.

on request Payslips and requests, with your management system, which stays the source of truth.

THE DOCTOR'S AND THE SAFETY OFFICER'S WORK, MANAGED BY HR

VivoMed

The medical service, with clinical data in the doctor's hands.

- Clinical record, signed medical notes, fitness decisions and restrictions.

on request Risk-based surveillance and a medical surveillance plan.

VivoGRC HSE

The safety officer's work, in-house or external.

- Risks, findings, plans, forms, compliance and Drive.
- Riesgoberto, the risk AI, with Uruguayan and Argentine regulations and the Codex; risk assessments and site plans, Inbox, controlled documents.

on request Other plans from the same engine, and what changed between versions.

OPERATIONS AND MAINTENANCE

VivoMant

Your team's maintenance tasks.

- Tasks with evidence and a yearly schedule.

on request Work orders, preventive maintenance per asset, spare parts and suppliers.

VivoWorks

Your plant: places, installations and the building.

- A tree of places with installations, extinguishers and chemicals.

on request Work orders, preventive maintenance, inspections, contractors and occupants.

Custom field apps

One app for each task your people do in the field.

- Phone, photos, checklist, signature and a PDF report.
- Works offline; psychosocial health; ergonomic assessments.

on request Safety walks, PPE, work permits, contractor induction.

DOCUMENTS AND REPORTS

Office in VivoGRC Core

Documents, spreadsheets, slides, PDF, whiteboard and drawing.

- docx, xlsx, pptx, PDF and SVG.
- Inside VivoGRC, nothing to install, offline too.

Reports on request

Tell us the question and we build it from your data.

- Editable in Vivo Docs, as a PDF and in Word, PowerPoint or Excel, with your brand.

How it connects

How they’re built

- **Enter it once, use it everywhere:** each app has the screen its users need, and what happens in one shows up in the others.
- **The client builds the menu:** spaces (for example Health and Safety, Quality, Environment) with their sections and apps, from the screen, no coding.
- **Riesgoberto works with what’s already on file:** with the same tools and permissions as a person, and proposes through the Inbox. Nothing changes until a person approves it.

on request

- **Integrates with the system you already have:** each app works on its own and, if you want, people, fitness decisions and due dates flow both ways with your management system, which stays the source of truth.

Security

- **Everyone sees what’s theirs:** permissions by role and work group; medical data kept apart.
- **A record of who did what and when** for the changes that matter: signatures, approvals, documents.
- **Sign in with your fingerprint or face,** no password.
- **No signal, no loss:** field apps and the Office save on the device and sync when the connection is back.
- **Riesgoberto works within the company’s AI use policy:** a person approves what it proposes, and personal data isn’t sent where it isn’t needed.
